

Attention Producers:

Heartland Livestock in Yorkton is having a Bred Cow and Bred Heifer sale this Friday November 24 at 11:00am. We are expecting 250-275 head for this sale consisting of 2 Herd Dispersals and 2 Reductions.

Dispersal Cows from Glen and Debbie Almasi and family. They are selling these cows due to health issues. These cows are Black, BBF, Red and RBF. They are due for April 1st calving and are bred to Red Angus Bulls. The calves were sold on September 27th and these cows are in excellent condition. This is a small herd and are very quiet. Please watch for this herd on Friday November 24.

This sale will be also live on DLMS.

Herd dispersal

With the rise of prices and a better return on your calves, what better time to invest in some good bred cows. Coming to our dispersal this Friday is a great set of black and speckle park cows from the Lungal family. This is a closed herd of quality cows looking for a new home. The herd ranges from heifers up to 8th calvers. These cows are quality home raised cows with lots of life left in them. Get ahold of any of these cows, and be confident they will work for you.
